

Technical Bulletin 167

Version 1.1 20th April 2016

New Tiger Select probe and instrument manual

Ion Science is committed to constant product improvements. Feedback from our Tiger Select customers has resulted in some great enhancements to the tube holder probe supplied with the Tiger Select. This new design offers the following benefits:

- The probe tip is more rigid offering a better pipe connection
- The probes will accept direct connection to Luer fittings
- The probe will also accept 4 mm and ¼" ID pipe push fit for calibration
- The tube seals are more robust with improved resistance to chemical aging

All Tiger Select instruments will be manufactured using this new probe arrangement from the end of February 2016.

All Tiger Select instruments can use this new design probe by purchasing the 'Complete assembly kit' listed below.

Complete assembly kit – Part number: A-880209
(Contains: all components shown in the diagram)

Seal multipack – Part number A-880216
(Contains: 880202 x 10)

Due to this change we have updated the Tiger Select manual. The new version is available for download from our website:
