

Technical Bulletin 157

Version 1.1 23rd October 2014

Corvus software and instrument firmware update

As part of Ion Science's commitment to ongoing improvement, the Corvus now has a software and firmware update available.

This new version of CorvusPC and firmware boasts a simplified calibration routine, improved long term sensor stability, improved data export facilities and many other features.

The upgrade of both software and firmware is simple – just follow the instruction in the user manual.

Both the manual and software can be downloaded from the Ion Science website.

For further information please contact:

Firmware version: V 0.48.0

Software version: V 1.0.0.43

Manual: [Corvus Manual V1.2](#)
