

## Press Release PR-100

23/10/2018

### ION Science offers FREE VOC Gas Table to customers who register Tiger instruments for five-year extended warranty

Ion Science leading manufacturer of high performance gas detection instrumentation for global environmental and occupational health monitoring applications – is offering a *free* gas table to customers who register their well proven Tiger and Tiger Select handheld volatile organic compound (VOC) detectors online to receive the company's industry-beating five-year extended warranty.

Customers will benefit from the five-year extended warranty by registering their Ion Science Tiger or Tiger Select Photoionisation Detector (PID) within one month of purchase via an online form. A confirmation email advises that the extended warranty period has been activated and processed. [www.ionscience.com/instrument-registration](http://www.ionscience.com/instrument-registration)

Ion Science's VOC Gas Table provides information on a wide range of potentially hazardous gases and vapours, with advice on the most suitable instrument for the application. It also contains vital detail on PID response factors. <http://info.ionscience.com/voc-gas-table>

Duncan Johns, Managing Director at Ion Science comments: "Ion Science's Tiger and Tiger Select handheld PIDs have established an unrivalled reputation for high performance, durability and reliability. The five-year extended warranty shows that we trust our products and have confidence in their longevity.

Cont.../2

He adds: “Instrument registration takes minutes with those customers being the first to receive product updates and notification of special offers. It also ensures a quick, hassle-free repair in the event of a service issue.”

Ion Science’s skilled engineers identify and resolve issues quickly for a fast turnaround. Taking advantage of the extended warranty is an effective way for customers to have peace of mind for a significantly longer period of time, at no extra expense.

Ion Science provides a full calibration, maintenance and repair service for all its instruments. The company’s qualified engineers are on hand to provide best of breed service and fast turnaround to ensure instruments are operational as soon as possible.
