

# Technical Bulletin 196

Version 1.0 11/03/2019

## Cub firmware & Cub PC software SW V0.0.0.51 & FW V0.0.85

The Cub firmware and PC software has been updated with a number of enhancements. Please install the new versions below to ensure you are up to date.

- Cub firmware version: V0.0.85
- Cub PC software version: V0.0.0.51

The improvements that have been made within this release are detailed below:

### Cub PC Software V0.0.0.51

- Cub PC to display gas name and RF
- Cub PC graph summary to display minimum value
- Cub PC to display dates chronologically

### Cub firmware V0.0.85

- Cub E—9 bug fix

The firmware and PC software can be upgraded directly via your existing version of Cub PC. Please refer to the relevant sections of the user manual for guidance. Alternatively, PC software can be downloaded from the Ion Science website: <http://www.ionscience.com/customer-support/media-centre/instrument-software/>
